INSPIRE State of Play

Joeri Robbrecht, EC DG Environment

IGN Institut Géographique National **.AGORIA**

co-founding partner

INSPIRE Directive Back in the beginning of the milennium

Policy Needs

<u>Better information</u> needed to support policies

But ... EU has islands of information & data of different standards and quality...

Pan-European issues

- **Data policy restrictions** (pricing, copyright, access rights, licensing policy)
- Lack of co-ordination across borders and between levels of government
- Lack of standards (incompatible information and information systems)
- **Existing data not re-usable** (fragmentation of information, redundancy, inability to integrate)

Policy Response

- **14 March 2007 -** DIRECTIVE 2007/2/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL establishing an Infrastructure for Spatial Information in the European Community (INSPIRE)
- 15 May 2007 Entry into Force
- 15 May 2009 Transposed in National Law

The INSPIRE Directive

Objective: create a European Union spatial data infrastructure to enable the sharing of environmental spatial information among public sector organisations, facilitate public access to spatial information across Europe and assist in policy-making across boundaries.

Rules

- Builds on existing Spatial Data Infrastructures
- Spatial data held by/on behalf of public authorities
- Does not require collection of new data
- Framework Directive with detailed implementing provisions in Implementing Rules

Implementation

- Defines 34 spatial data themes that are in scope
- Requires Member States to
 - transpose the Directive
 - set up a national coordination structure
 - identify relevant spatial data
 - document identified data
 - publish data and metadata for download, view and reuse
 - make data interoperable

Monitoring & Reporting

- Monitoring data is harvested from 35 online catalogs in the Member States and indicators are automatically calculated on a yearly basis.
- Reporting consist of yearly updating an online country fiche.

Deadlines have passed – data should at least be available as-is

Metadata

03/12/2010: Metadata available for spatial data sets and services corresponding to Annex I and II 03/12/2013: Metadata available for spatial data sets and services corresponding to Annex III

Netwerk services

09/11/2011: Discovery and view services operational 28/12/2012: Download services operational

Interoperability

23/11/2017 Implementation of Commission Regulation (EU) No 1089/2010 of 23 November 2010 implementing Directive 2007/2/EC of the European Parliament and of the Council as regards interoperability of spatial data sets and services for Annex I spatial data sets

21/10/2020: Other Annex II and III spatial data sets available in accordance with IRs for Annex II and III

INSPIRE Monitoring 2019 - transition year

- Defined by the new Commission Implementing Decision (EU) 2019/1372 of 19 August 2019*
 - Guidance document for calculation of 19 indicators (new indicators: PDS, Spatial scope, Downloadable, Viewable data sets from EU Geoportal) was prepared (7/2019).
 - The process of MS metadata collection and indicator calculation integrated with the process of publication of MS metadata to EU Geoportal.
 - The first use of Reference Validator for a bulk automated validation of MS Metadata for data sets and services (*MDi 1.1 & MDi 1.2*).
 - The whole activity executed and coordinated by JRC with big support of MS experts (i.e. MIWP 2018.1 sub group on Monitoring & Reporting, MIG-T, National MD catalogue administrators.)

<u>* https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32019D1372&from=EN</u>
** Guidance document for the calculation of indicators (DOC 6)

INSPIRE Monitoring 2019 – selected stats

- 35 MD Catalogues harvested (32 National / 3 Regional)
 - 159 316 Metadata of data sets records
 - 3 203 Metadata of data set series records
 - 98 541 Metadata of spatial data of services
- 260 000+ metadata records validated by Reference Validator

https://inspire-geoportal.ec.europa.eu/mr2019.html

INSPIRE MS Data sets availability Spatial scope (DSi 1.4; DSi1.5)

Total: 159 003 MD of data sets, series (DSi 1.1)

https://inspire-geoportal.ec.europa.eu/mr2019.html

INSPIRE MS Data sets availability Spatial scope (DSi 1.4; DSi1.5)

Total: 159 003 MD of data sets, series (DSi 1.1)

INSPIRE Overall MS Resource conformity (MDi1.1-1.2; DSi 2.0; NSi 4.0)

Total: 257 524 MD of data sets, series, services (MDi 1.1 & 1.2)

INSPIRE MS Data sets accessibility (NSi 2.0-2.2)

Total: 55 042 MS data sets accessible

.ec.europa.eu/mr2019.html

INSPIRE MS Data sets accessibility (NSi 2.0-2.2)

Total: 55 042 MS data sets accessible

INSPIRE Monitoring 2019 Lessons learnt

- The level of MS MD conformity is low (cc. 35%) & still in TG 1.3. (95+%)
- The level of MS data accessibility (download, view) is still low (cc. 30%).
- The gap between the nr. of existing spatial data services (cc. 100 000) and data accessibility is still big.
- The high MS demand for detail ICT support is not / can hardly be satisfied by JRC INSPIRE Support team.

INSPIRE Monitoring 2019 Lessons learnt

- Very good feedback and overall positive interactions with MS experts led to better mutual understanding of the MS & as JRC Geoportal MD systems.
- Substantial improvements of INSPIRE Reference Validator as well as further simplification of Geoportal back-end.
- The introduction of the new indicators (i.e. keywords for spatial scope, PDs) led to increased data usability potential + provides a better overview of EU SDI data availability/accessibility.
- The reliable base line for the EU Spatial data infrastructure has been jointly set up (good reference for monitoring progress towards agreed INSPIRE landing zones, INSPIRE evaluation, ...).
- The IT systems improvements, gained knowledge on both sides, represent a good perspective for smoother and even more integrated INSPIRE Monitoring 2020 exercise.

Looking forward

The evaluation of the INSPIRE Directive & the links with the GreenData4All initiative and the broader green/digital agenda

General introduction to the evaluation

- Mandatory evaluation of the Directive by 1 January 2022
- The 2016 REFIT will feed into the evidence base for the evaluation.
- A Public consultation is planned for December 2020, targeted consultations for Dec Jan 2020. The Commission will publish the results of the evaluation in the form of a Staff Working Document (SWD) in Q4 2021.
- Geographical scope: all EU Member States and the EEA/EFTA countries.
- Temporal scope: 2014-2020.
- Better Regulation evaluation criteria: effectiveness, efficiency, coherence, relevance and EU added-value.
- The findings of the evaluation may lead to further EU action, such as revised legislation subject to the results of a possible impact assessment.

INSPIRE REFIT 2016 Findings

- INSPIRE Directive is still fit for purpose
- The overall relevance of the Directive remains high, and is expected to increase given the drive towards a digital economy.

Recommendations for Member States

- Improve INSPIRE coordination
- Close specific implementation gaps
- Publish data relevant to environmental law conform to INSPIRE
- Further remove inefficiencies in data policies
- Align the national INSPIRE implementation with the drive towards an EU Digital Single Market

Recommendations for the European Commission

- Reflect on possible revisions of the legislation
- Priority setting
- Develop EU-level end-user applications
- Adapt INSPIRE to better regulation principles
- Address the lack of resources by exploring funding programmes opportunities to help capacity building

INSPIRE as digital enabling instrument

- The European Data Strategy announces a 'GreenData4All' initiative to
 - Evaluate the INSPIRE Directive and look at the coherence with the public access to environmental information Directive 2003/4/EC,
 - modernize both Directives to align them with the contemporary state of technology,
 - promote active dissemination and sharing of government- and private-held public data in support of the environmental acquis, the Green Deal objectives and the development of European common Green Deal data space.
- Opportunities to strengthen the coherence and synergies with the recently revised European legislation on Open Data
 - specifically on aligning provisions on data sharing and re-use

European Green Dea

Interoperability between data spaces is key

BeGeo

A NEW INSPIRE MIWP 2020-2024

"Towards a Common European Green Deal data space for environment and sustainability"

- Favourable political and technological context for the evolution and sustainability of INSPIRE within the Green Deal Data space and beyond
- Under discussion in the INSPIRE MIG
- 3 areas of work
- 6 core actions

3 areas of work

- 1. A digital ecosystem for the environment and sustainability (objective 1)
- 2. Towards a common implementation landing zone (objectives 2-4)
- 3. GreenData4All (objective 5)
- All areas of work will start in parallel
- Preparatory activities already ongoing for aligning the work

6 core actions

1.1 Towards a digital ecosystem for the environment and sustainability

- 2.1 Need-driven data prioritisation
- 2.2 Roadmap for priority-driven implementation
- 2.3 Simplification of INSPIRE implementation
- 2.4 Central infrastructure components
- 3.1 GreenData4all initiative
