

Smart textiles

A new tool for healthcare

Mark Croes

Mobile Health Congress – 30/11/2016

Centexbel

Technical and Scientific Textile Centre

independent and objective advice, research and testing

the expertise of 150 highly educated collaborators

transsectorial and international networking

focus on sustainable development

practice-oriented support

partnership

an open approach

Products & Activities

■ R&D ■ Testing ■ Services

Centexbel - testing

Accredited Laboratories

fire

FR - properties
flame propagation
fumes
smoke density ...

physical

abrasion
color fastness
anti-static
Waterproof ...

chemical

permeation
heavy metals
emission
fibre identification ...

microbiological

barrier properties
cleanroom
anti-microbial
cytotoxicity ...

Research - Technology Fields

Functional thermoplastic textiles

- Meltprocessing of polymers in textiles and composites

Textile functionalisation and surface modification

- Coating, finishing and surface modification for new and superior functional performances

Health, safety and security

- Textile products for health, safety and security purposes

Centexbel – certification and services

certification

PPE

Toys

Carpet

Coaches

floor- and wall coverings

textiles and
harmful substances

sustainable production processes

recycling

services

consultancy

training

standardisation and legislation

patent support

publications – website –
brochures – social media - ...

Smart Textiles – Care of tomorrow

- Diagnosis
- Revalidation
- Treatment
- Comfort
- Prevention

- Sleep quality
- Heart rate
- Breathing
- Snoring

beddit

SENSOTISS[®]

- Occupation
- Fall risk

BlueTouch Pain Relief

Smart clothes can be more inconspicuous than watches and can record more data, and manufacturers do not have to convince people to wear clothes as they do watches -- they are already doing it.

PROJECT JACQUARD 

Embedding conductors

Conductive yarns
Stretchable patches

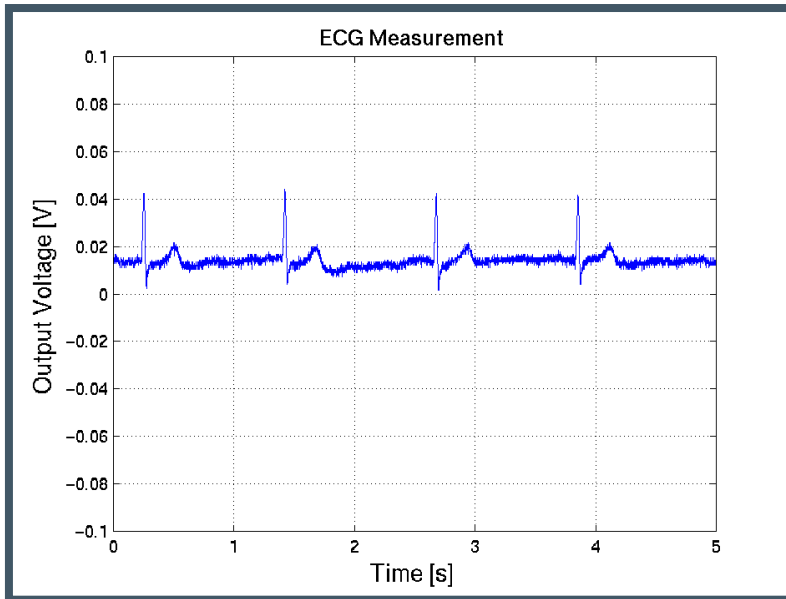

Textile embedded sensors

Realizing pressure sensors using textile process e.g.: Keyboard

Textile embedded sensors

- Detection of vital signs
e.g.: Heartbeat rate

Textile embedded sensors

- Movement sensors
 - e.g.: respiration detector

Smart brace

Monitoring harness with embedded optical sensors

Carpet with embedded sensors

Encapsulation by screenprinting

Conductive tracks by screenprinting

electroluminescence

Embedded lighting elements

- Fiber optics
- Led's

Smart textiles: towards full integration

Preserving textile characteristics

Ensure maximal comfort

Requirements for electronic components and circuits

- **Thickness**
- **Light weight**
- **flexibility**

Additional properties

- **Drape**
- **Elasticity**
- **Breathability**
- **Washability**

SMARTpro: from lab-demo to industrial manufacturing

Through cross-sectoral cooperation

textiles			
electronics			
ICT			

for several application areas

- intervention
- sport and leisure
- technical
- (home) care

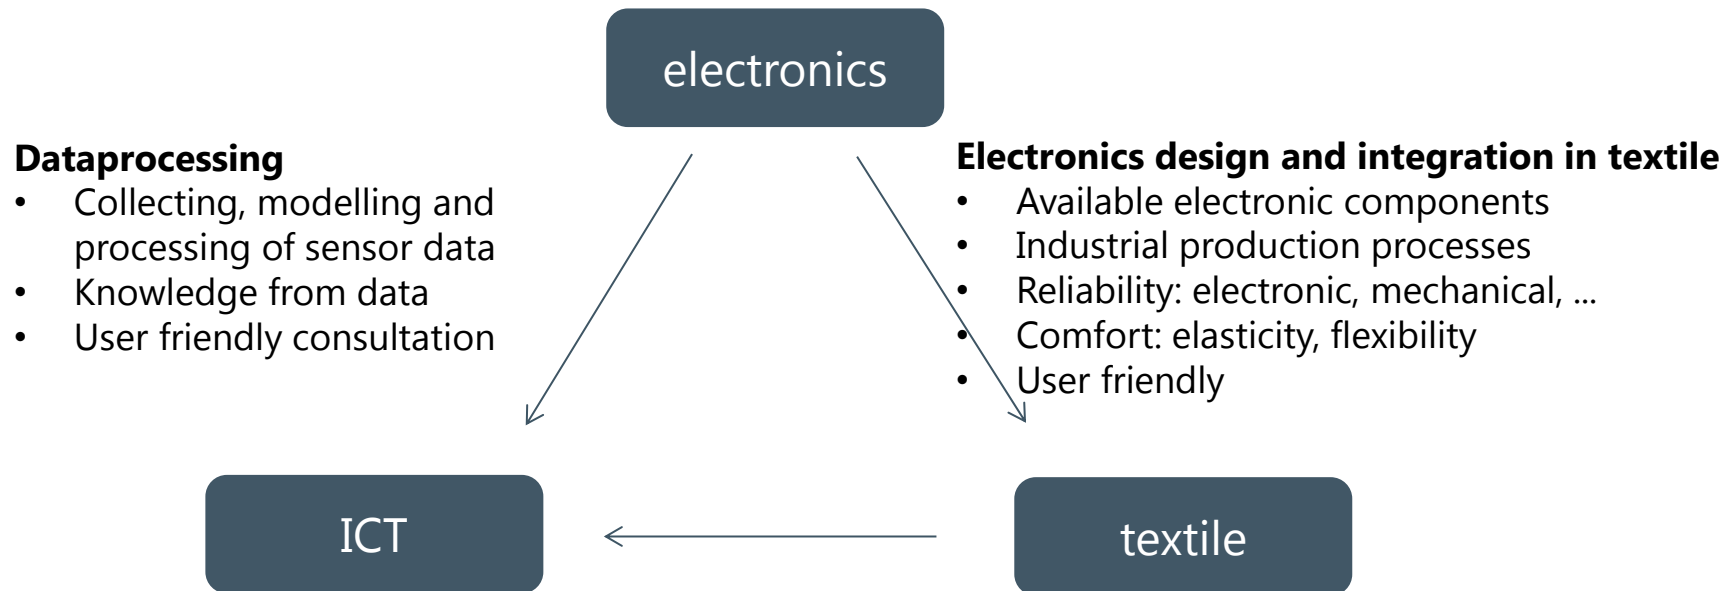

By the industry

- ABS Laundry Business Solutions
- Balta Industries
- BekaertDeslee
- Helioscreen
- Niko Projects
- Sioen Apparel
- Yazzoom
- 2enjoy
- Aerosleep
- Bekaert-Bekintex
- Elasta
- Gociety
- Henkel Electronic Materials
- Page Electronica
- Televic Group
- Wollux
- ActWithCare
- Connect Group
- Esri
- Gysemans Clothing Group
- Quad Industries
- TIO3 – TIC
- ALLTHINGSTALK
- Custom8
- Europlasma
- Haelvoet
- Maastricht Instruments
- Sioen Industries
- VTEC
- NRB

Supported by

SMARTpro: challenges, options, possibilities

Objectives end users

- **Sport, care, intervention:** localisation, physiological parameters, temperature, activity monitoring
- **Technical:** pressure, temperatur, mechanical parameters
- Meet specifications
- Certification

SMART-pro: global approach for individual users

- **One design – multiple applications**

- **Combine companies and competences**

- End-users
- Textile manufacturers
- Assembly
- Material suppliers

- **Integration**

- Conductive yarns or printing inks
- Circuits and connectors
- Encapsulation

SMARTpro case - continuous and unobtrusive monitoring of elderly

- Wandering
 - recognise where the patient is located and whether he or she is supposed to be there
- Fall detection
 - recognise a fall incident
- Activity monitoring
 - recognizing normal movement patterns
- Physiological condition
 - Monitoring of health status, trends and evolution

SMARTpro Database

SMART TEXTILES
AND
WEARABLE
INTELLIGENCE

Filter by application area:

- clothing (139)
- other (93)
- health/medical (63)
- sports (57)
- protection (31)

Filter by item composition:

- system (S) (202)
- component (C) (79)
- material (M) (30)

Filter by item maturity:

- prototype (PT) (165)
- commercial product (CP) (135)

Filter by kind of institute:

- company (184)
- academia (78)
- research institute (22)
- consortium/cooperation (19)

Filter by actuators:

- ▶ optical (98)
- communication (80)
- ▶ interconnections (71)
- other (41)
- ▶ mechanical (40)
- data processing unit (30)
- ▶ thermal (24)
- ▶ energy (19)
- ▶ electrical (16)
- ▶ chemical (2)

Filter by process technologies:

- weaving (20)
- ▶ printing (18)
- embroidery (17)
- knitting (9)
- ▶ coating (6)
- soldering (4)
- laminating (3)
- other (3)
- ▶ plasma (3)

What can you do?

- Miniaturised/wearable smart circuits
- Smart power supply
- Data collection and storage
- Security and communication
- Data analysis
- Customer interface
- After sales service
- ...
